Onur Simsek

Senior Software Engineer | Implementation & Integration | Backend & Full-Stack | Remote / Global Teams
+90 545 114 84 96 | onursimsek0643@gmail.com | linkedin.com/in/s-onur/ | github.com/simsekonur

Summary

Senior Software Engineer with 6+ years of experience building and maintaining backend-focused full-stack applications and services. Experienced working remotely with globally distributed engineering teams, independently owning projects across multiple repositories and collaborating directly with international stakeholders.
Strong background in TypeScript, JavaScript, Node.js, Python, Java, C#, PostgreSQL, MongoDB, and Elasticsearch, with experience in scalable services, unit testing, automation, data processing, integrations, and production systems. Known for taking ownership from implementation through deployment, support, and continuous improvement.

Core Expertise

Domains & Practices: Backend Engineering, Full-Stack Development, Implementation Engineering, Integration Engineering, Distributed Systems, Data Processing, Workflow Automation, Production Support, Technical Ownership, Remote Collaboration

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, C#, C++
Backend & Frameworks: Node.js, NestJS, Express, Spring Boot, REST APIs, Qt
Frontend: React
Databases & Search: PostgreSQL, MongoDB, MySQL, Elasticsearch, Apache Hive
Testing & Automation: Jest, Playwright, Puppeteer
Tools & Infrastructure: GitHub Actions, Linux/Unix, NinjaOne

Work Experience

Senior Software Engineer — Integrations & Backend Apr 2024 – Sep 2026
Just Appraised | Contract · Remote *USA*

- Maintained end-to-end technical ownership across 8 core integration repositories within a globally distributed team of 11 engineers, collaborating directly with the CTO to align on architecture and strategic feedback, while independently handling on-call rotations and delivering post-onboarding software enhancements.
- Engineered custom client integration services and containerized backend jobs (C#, Java, Python) that enabled county assessors to review, correct, and load verified property records directly into client databases or via public APIs.
- Attended technical client calls alongside Customer Engineers to gather feedback, independently transforming customer requirements into production-ready software integrations and implementations.
- Architected nightly containerized data extraction, transformation, and ingestion pipelines to process customer database records, parse massive text files into structured CSV outputs, and extract, index, and export high-volume image/deed files from network drives for cloud ingestion.
- Managed production deployments and system operations across client environments, utilizing NinjaOne for remote Virtual Machine (VM) connections, NSSM for Windows service management, and GitHub Actions for continuous integration pipelines.

Software Engineer Apr 2022 – Apr 2024
TrendMD | Contract · Remote *Toronto, Canada*

- Collaborated in a globally distributed team of 8 engineers to build backend microservices, crawlers, and cron jobs (TypeScript, Node.js, NestJS, React, PostgreSQL, Hive, Elasticsearch) powering recommendation systems for 100M+ unique visitors across 7+ core repositories.
- Engineered 5+ new and modified 10+ existing Node.js CLI tools interacting with 50M+ database records; implemented TDD/unit testing and Slack API notifications, including automated daily QA cron checks that reduced manual QA workload by 40%.
- Implemented user-facing feature requests across client dashboards and backend service methods, while executing complex database queries in PostgreSQL, Hive, and Elasticsearch for deep operational data analysis.

- Led codebase modernization by migrating legacy JavaScript microservices to TypeScript and updating core dependency trees to boost overall system maintainability.
- Resolved 300+ support tickets for international clients and collaborated closely with cross-functional sales and product teams during designated on-call rotation weeks.
- Designed metadata web crawlers using Puppeteer/Playwright with Similarweb and Twitter integrations, automating reporting workflows via Google Sheets API.

Software Engineer Jul 2020 – Apr 2022

Retrace (via Avena IT) | Contract · Remote *San Francisco, USA*

- Engineered end-to-end full-stack web features (JavaScript, Node.js, React, MongoDB) connecting dental clinics, patients, and insurers, collaborating closely with QA engineers to resolve issues and optimize page load performance.
- Developed web scraping bots using Puppeteer and Node.js; optimized bot execution logic to achieve an 80% performance and accuracy improvement.
- Worked in a globally distributed team, communicating directly with the company's CTO and VP of Engineering during daily syncs and technical planning.

Software Engineer March 2020 – July 2020

Avena IT | Remote *Ankara, Turkey*

- Engineered the greenfield full-stack architecture (frontend and backend) for the company's first proprietary SaaS application using Node.js, React, MongoDB, and CSS to automate internal time tracking and operational workflows.
- Designed and implemented complex backend service methods and REST endpoints to process multi-variable invoice data, rendering structured financial documents seamlessly in an integrated PDF viewer.

Education

Middle East Technical University Ankara, Turkey

B.Sc. in Computer Engineering | CGPA: 3.19 *2015 – 2020*

Earlier Experience & Projects

Software Engineer (Graduation Project) Oct 2019 – Jun 2020

STM *Ankara, Turkey*

- Engineered backend components of a multithreaded desktop optimization application used in defense systems using C++, Qt, POSIX threads, and MySQL. (Demo Video | Source Code)

Engineering Internships 2018 – 2019

TÜBİTAK BİLGEM and Spark Calibration *Ankara, Turkey*

- Built C++ static libraries for function execution timing using POSIX/TCP (Source Code), developed full-stack web alerting applications with React, Spring Boot, and PostgreSQL (Source Code), and processed image dataset labeling for deep learning models in Python.

Language Skills

- Turkish (Native)
- English (Professional Working Proficiency)
